

Erratum

In the article, "Limited Genetic Variation across the Range of the Red-Bellied Newt, *Taricha rivularis*," by Shawn R. Kuchta and An-Ming Tan, which appeared in Volume 40, Issue 4 (December 2006), pp. 561–565, the caption for Figure 1 was incorrect. The caption should have stated, "Map of north-central California showing the distribution of *Taricha rivularis*. The San

Francisco Bay area is located at the southern limit of the map. Numbers correspond to sampled populations in the current study (Table 1). The two stars, along with population 1, show the sampling localities of Hedgecock and Ayala (1974). The isolation by distance study of Hedgecock (1978) took place between the open circle and population 1."
